SKILLS

Languages: JavaScript, TypeScript, Python, SQL.

Frameworks & Tools: React, NextJs, ReactNative, Express, FastAPI, Django, GraphQL, Docker, Wordpress.

Databases & Tools: PostgreSQL, MongoDB, Redis, AWS, RabbitMQ, gRPC, Linux.

EXPERIENCE

Software Engineer

CREDLANCHE LIMITED

Remote

December 2025 - March 2026

- Implemented responsive and accessible UI components to ensure a smooth experience across devices.
- Built the end-to-end merchant onboarding flow for VantPay, a CBN-licensed payments infrastructure platform, streamlining business registration and reducing account setup time by 25%
- Integrated KYC verification and core banking APIs to automate savings account creation, enabling seamless onboarding for 1,000+ merchants
- Built the Credlanche corporate website end-to-end using Next.js, delivering a polished, fully responsive UI with dynamic animations including scroll-triggered counters, marquee carousels, and tabbed product showcases
- Optimized site performance and SEO structure, ensuring fast load times and discoverability for a CBN-regulated financial services holding company

Software Engineer

IDERATECH

Remote

June 2025 - January 2026

- Built and shipped two production Next.js web products, [flurfinance.com](#) and [flurtechnologies.com](#), for a CBN-compliant collaborative finance platform targeting Nigerian families, groups, and merchants.
- Implemented responsive, conversion-focused UIs featuring animated marquees, tabbed product showcases, and mobile-first layouts across both sites.
- Translated complex fintech product offerings, including group wallets, bill splitting, and social commerce tools, into clean, accessible user-facing interfaces

Software Engineer

RENOWN COMMODITY TRADING.

Remote

May 2025 - October 2025

- Built a dual-role PWA from the ground up, delivering separate, purpose-built experiences for buyers and sellers on a single codebase, reducing development overhead and ensuring consistent UX across both flows.
- Developed the superadmin dashboard, enabling the ops team to manage users, orders, meal tickets, and platform activity from a centralized control panel.
- Implemented PWA capabilities including offline support, installability, and mobile-first responsive design — making the platform accessible across low-bandwidth environments

Software Engineer

KWENUAI

Remote

February 2025 - May 2026

- Built and integrated core platform features including user-facing pages, API connections, and data management workflows.
- Developed and maintained the Kwenuai platform (kwenuai.com.ng) as a fullstack engineer, owning both frontend interfaces and backend logic end-to-end

Software Engineer

H. PIERSON ASSOCIATES LIMITED

Remote

August 2022 - May 2023

- Delivered and managed content-driven web solutions using WordPress CMS, building custom themes and plugins tailored to client requirements
- Delivered and managed content-driven web solutions using WordPress CMS, building custom themes and plugins tailored to client requirement

Software Developer Intern

HNG Internship

Remote

October 2022 - December 2022

- learned the basics of software development- Collaborated with other developers

PROJECTS

Digitvant Merchant Portal - Merchant Financial Operations Platform

- Built a market dashboard with 6 real-time widgets, reducing research time by 40% for 300+ active users.
- Implemented AI-driven email automation for news digests, boosting daily engagement by 60%.
- Expanded coverage to 325+ stock symbols across 5 sectors, reducing discovery time for new users by 50%.

Credlance Limited Website - Financial Services Platform

- Built the company marketing website, translating product requirements into responsive and accessible web pages.
- Developed reusable UI components to maintain design consistency across product pages.
- Structured product content to clearly communicate financial offerings and improve user engagement.

Pikka - Web Asset Extraction Tool

- Built a browser tool that lets users extract web assets (images, SVGs, colors, and fonts) from websites in one click.
- Reduced the time designers and developers spend sourcing assets from minutes to seconds.
- Implemented a lightweight UI and browser-based detection engine for fast asset discovery.

LEADERSHIP & VOLUNTEERING

Mentor, HNG Internship

Remote

- Led and supported 100+ software engineers through a seasonal mentorship program, guiding them to apply engineering principles and ship production-ready applications used by thousands of participants.
- Provided technical guidance, code reviews, and problem-solving support to help teams successfully ship projects used by **thousands of participants**.

Hacktoberfest OpenSource Contribution

- Contributed to open-source projects by submitting pull requests, improving documentation, and fixing bugs across community repositories.
- Collaborated with maintainers and developers globally to improve project quality and maintainability.

EDUCATION

YABA COLLEGE OF TECHNOLOGY

Computer Science

Relevant Coursework: Python, Data Structures and Algorithms, Object-Oriented Programming, System Analysis, Database Systems, Computer Architecture, AI, Agent-Based Systems, Low-Level Languages(x86).
